Touched By A Paw, Inc.

User Interface Plan

Kevin Hill

Interactive User Interface Plan

Mobile Hamburger Menu

This element will only appear on mobile and tablet screen widths. When a user taps the hamburger icon, the full site navigation will be revealed from the top of their screen. Clicking the hamburger icon again will collapse the navigation.

Slide-Out Advertisement

The slide-out advertisement will be a small box that appears on the bottom-right side of the user's screen. It will prompt users to sign up for Touched By A Paw's newsletter. Users can directly enter their email there, and click "Submit" or "Dismiss" to get rid of the advertisement.

Accordion

Touched By A Paw's updated website will feature an FAQ section, which will be organized by accordions. When users click an accordion, it will expand to show its contents. On clicking an accordion, all other accordions will collapse.

Weather API Integration

To integrate a JavaScript API, the website will call a weather API for Touched By A Paw's location. Those results will display alongside a banner that reads "Rain or shine, we have the perfect pet for you!". Users will then be able to click this to navigate to the adoption page.
